

An Empire

Bank Needed

**English Banking Expert Explains
How Canada Could Restore
Value Of Silver**

Canada is invited to embark on a great adventure in world finance which, almost at a stroke, would wipe out world depression and restore the purchasing power of countless millions of people in Asiatic and South American countries. The proposal in brief was to restore the value of silver as money and stabilize it at

The proposal was advanced by J. F. Darling of London, England, director of the Midland Bank and world-famed authority on silver. On the invitation of Premier R. B. Bennett, he addressed the banking and commerce committee of the House of Commons.

Scouting the proposed international conference on the silver question as a cumbersome and lengthy procedure which could arrive at no decision until "after the ship had foundered," Mr. Darling proposed a more direct

method with the British Empire leading the world and Canada leading the British Empire.

Basically the scheme involved the establishment of a "super-bank of Empires," which would take over all the gold and silver in the British Empire and use a new monetary unit which would be called the "lex." This unit, however, would be merely a book-keeping device and would not be issued as a medium of exchange.

This bank would maintain equilibrium between the two great money metals of the world, gold and silver.

are overlooked in the list.

pe-twentieth the value of gold. Due to the debasement of the value of silver in recent years, he claimed, purchases by the countries of Asia and of Central and South America which used silver largely as a currency had been greatly decreased.

The forthcoming Imperial economic conference at Ottawa would be an excellent opportunity to launch the scheme, Mr. Darling said, and he

old thing of no man being capable of giving leadership in the movement than Premier Bennett.

At the time the League started the movement, Mr. Darling was sure the United States, the other great world financial power, would join in as well as other countries, because it would work to the benefit of the world as a whole.

But he would not offer a definite prediction the distinguished banker said, but thought the scheme would raise prices. This was essential, he said, as it was impossible to maintain present wage levels or to liquidate international debts on the present price level. The League would be a source of reserve prices on which it was as

five per cent. of the total number. The remainder was more than

the present "terrible morass."
Mr. Darling was closely questioned by members of the committee after he had finished his address and much interest in the proposal was evidenced.

Value Of Forest Products

Annual Value Of Forest Products In Canada Placed At Five Hundred

Million Dollars
The annual value of forest products in Canada is placed at approximately \$500,000,000 by the Canadian Government Forestry Service, and over 200,000 persons are employed in the extraction and manufacture of the products of the forests of the Dominion. Last year the value of these exports was over \$281,000,000. There are about 3,000 saw mills and 106 pulp and paper mills in Canada. The saw mills represent a capital investment of \$4,848,000,000, and the pulp and paper mills, \$1,448,000,000.

one square inch left no impression

000. The former employed about 45,000 persons and the latter about 34,000.

Feed Value Of Groats

A carload of groats has reached Edmonton and is now in the hands of government grain inspectors—groats being wild oats with the hulls

manufactured tobacco. Of the u-

value than any other grain. So rich is this feed, it is said, that stock cannot be put on a straight diet of it, at any time.

"That's the cat's pajamas," remarked Mr. Henpeck, as he picked up his wife's sleeping togs.

One thousand scoutmasters recently attended a Boy Scouts' meeting at

Brighton, England.

Alaska has 63 landing fields for airplanes.

persons present, especially those who remember the price of this article before the Great War!"—*Journal Amusant, Paris.*

Survey Is Made Of The Proposed Mafeking Cut-Off Line

Ottawa, Ont.—Construction of the Mafeking cut-off on the Hudson Bay Railway provided material for a lively discussion in the House of Commons and drew from Hon. R. B. Bennett, Minister of Railways and Canals, the statement that survey of the proposed line had been made during the winter and that whether it would be constructed or not would be determined by the survey and the financial condition of the country.

The house had under consideration a vote of \$500,000 for the Hudson Bay Railway when J. L. Brown (Liberal-Conservative) asked about the Mafeking cut-off. It had been a dominating subject in the session, calling for discussion by Bennett as well as speaking at Dauphin. Dr. Macdonald had pointed out that the cut-off was not a question of power. Dr. Macdonald was asked by J. L. Brown to repeat his statement. The Conservative member for Dauphin, J. L. Brown, was asked to repeat his statement.

"I did speak in a number of places," declared Dr. Macdonald. "And any honorable friend will remember he was quite a number of times in the House." "You did not say in my committee," replied the minister, "and I am sure my committee would not be here today criticizing me. We could not hold the session planned for the 10th of August, as we were informed that a number of members had been detained."

"I do not believe the Mafeking cut-off will be better than the line which I do not believe it is the line which will give the best service to the country," declared Dr. Macdonald. "I do not believe it is the line which will give the best service to the country."

Plans For Conference On Unemployment
Major Of Winnipeg Proposes Meeting Of Manitoba City Officials
Winnipeg, Man.—Major Ralph H. Brown, mayor of Winnipeg, has proposed a conference for a province-wide unemployment conference. Mayors of cities and towns and several municipalities will be invited to attend. The conference will be held in Winnipeg next month and will be held before the provincial government.

Removal of this large amount of surplus is a considerable expense, but the way to a considerable extent for the marketing of Canadian wheat. The cost of the marketing of Canadian wheat will be substantially less than 1930.

Questions Must Be Answered
People Called Upon To Give Current Taxation All Information
Ottawa, Ont.—All persons in Canada are being called upon to give current information of their income and assets to the tax authorities. The information obtained in the census can be used for statistical purposes only and will not be used for any other purpose.

Imagination Cannot Grasp The Progress The World May Make In The Vista Of Future Years

To those who sometimes express the wish that they might travel into the future, the world may be a very different place than it is now. The progress that the world may make in the vista of future years may make them seem a very trivial thing.

In the year twelve thousand years ago man made his first steps in the stone age. It was only after the advent of the steam age in the early part of the nineteenth century that scientific progress began to make any headway. Today, steam has been largely been displaced by electricity, and electricity itself is only in its infancy. The progress that the world may make in the vista of future years may make them seem a very trivial thing.

Millions of years before the Jewish people came to the land of Canaan, the world may be a very different place than it is now. The progress that the world may make in the vista of future years may make them seem a very trivial thing.

All stages of imagination. Those who desire to see the world as it is, and not as it may be, should not let their imagination get the best of them.

Tuberculosis Tests
Saskatchewan Occupies Envious Position, Fracker Tests Show

Second only to Prince Edward Island in the health of its cattle from the standpoint of tuberculin tests, Saskatchewan occupies an enviable position in the Dominion. The results of the tests conducted show that 13,145 head of cattle recently tested in the province were free from tuberculosis. This compares with 11,150 in 1918, 10,150 in 1917, and 10,150 in 1916. The tests were conducted by the health of animals branch, Ottawa, and Dr. M. Parker, chief inspector in charge of the work.

Investigate Radium
Royal Inquiry Into Use Of Radium Treatment Will Be Held In Ontario

The appointment of James H. J. Coffey, of Toronto, to head a royal inquiry by the province of Ontario into the use of radium as a treatment for cancer, was announced by Premier George H. Henry. As a member of the commission, he will have Professor J. C. McLennan, of the University of Toronto, Dr. W. T. Cooper, of Queen's University, Kingston; Arthur Power, managing editor of the London Free Press; and Hon. Dr. M. H. Bohn, provincial minister of health.

Record Butterfat Test
High-Producing Jersey Cow Gained By Alberta Man

What is believed to be a record butterfat test for a cow of any breed is claimed by Norman B. Clarke, of Calgary, for the three-year-old Jersey cow "Wakiki Snow," which in 1918, in official R.O.P. test for the past 60 days, made a test of 84 per cent.

The high-producing cow is one of the choice animals purchased last year by Mr. Clarke from the state of Washington, and added to his herd at Calgary. The butterfat content of the milk, which is exceptionally high for even a cow of this breed, is certified by F. King of the Dominion Government cow-testing staff.

At this rate, the Clarke cow, in her first year, will produce 21 pounds of butterfat per day, producing sufficient butterfat to make approximately 21 pounds of butter.

Use Of Combines
Big Hauling Effort In Combining Harvesting Of Wheat

According to the annual report of the Director of the Dominion Experiment Station, the use of combines in harvesting wheat in Western Canada in 1918 was 1,200,000 acres. This compares with 1,100,000 acres in 1917, and 1,000,000 acres in 1916.

The use of combines in harvesting wheat in Western Canada in 1918 was 1,200,000 acres. This compares with 1,100,000 acres in 1917, and 1,000,000 acres in 1916.

Record Butterfat Test
High-Producing Jersey Cow Gained By Alberta Man

What is believed to be a record butterfat test for a cow of any breed is claimed by Norman B. Clarke, of Calgary, for the three-year-old Jersey cow "Wakiki Snow," which in 1918, in official R.O.P. test for the past 60 days, made a test of 84 per cent.

The high-producing cow is one of the choice animals purchased last year by Mr. Clarke from the state of Washington, and added to his herd at Calgary. The butterfat content of the milk, which is exceptionally high for even a cow of this breed, is certified by F. King of the Dominion Government cow-testing staff.

At this rate, the Clarke cow, in her first year, will produce 21 pounds of butterfat per day, producing sufficient butterfat to make approximately 21 pounds of butter.

Use Of Combines
Big Hauling Effort In Combining Harvesting Of Wheat

According to the annual report of the Director of the Dominion Experiment Station, the use of combines in harvesting wheat in Western Canada in 1918 was 1,200,000 acres. This compares with 1,100,000 acres in 1917, and 1,000,000 acres in 1916.

The use of combines in harvesting wheat in Western Canada in 1918 was 1,200,000 acres. This compares with 1,100,000 acres in 1917, and 1,000,000 acres in 1916.
